Dr. Karima has more than 90 international publications and 3 patents. She has also supervised 26 Masters of Science and PH.D theses. Furthermore, Dr. Karima is decorated with a number of awards including: NRC Scientific encouraging Prize in Chemistry, Egypt in 1991; International Federation of Inventors Mediterranean competition for inventions protecting the environment, Italy in 1995; Prof. Dr. M. k. Tolba's Environmental Prize for:

"The Best Applied Research to Protect Air, Water and/or Soil" (ARST) 1998 and NRC Scientific Appreciation Prize, Egypt 2012. In addition, Dr. Karima was awarded a number of certifications including: Certificate of Appreciation from Syndicate of Chemistry for her contribution dissemination of culture and scientific information in 2007 and Certificate of scientific achievement at NRC for four consecutive years in 2009, 2010, 2011 and 2012.

Dr. Karima acted as Principal Investigator (PI) and Co PI for the National and international research on a number of projects. She acted as a referee for international and national research papers, projects and theses. She organizes and conducts international training courses addition to Chairing and Co-chairing International and national Conferences & Exhibitions. She has conducted a number of presentations in the field of wet processing of textiles at the National Research Centre. Dr. Karima's research focuses on microwave in textile wet processes, nanotechnology in textile, improving performance properties of colored textiles, Eco-friendly dyeing and pigment printing's pollution prevention and cleaner production in textile.
